# SIMATS ENGINEERING

Dear Parent of Leela Prasad,

Greetings from SIMATS Engineering!

As a mentor, I am pleased to note that Leela Prasad has maintained excellent academic consistency, successfully completing 32 courses with strong performance across core subjects. Currently he is doing PDD design development with an attendance of 99%. At this stage, he is encouraged to enhance his practical exposure through internships, preferably stipend-based, to complement his academic learning with real-world experience. He has completed all courses except Technical English. He is appearing for TCS interview in next week and advised to put more effort to get placed in a good concern. Advised to participate in hackathon to aid up for placement process.

Active participation in placement training sessions will help him strengthen problem-solving, communication, and aptitude skills essential for recruitment success. Pursuing certifications in domains such as AI/ML, Data Science, Cloud Computing, or Cybersecurity will further broaden his technical profile and align him with industry trends.

From a parental perspective, continued encouragement and guidance will support his efforts in achieving academic distinction and professional readiness.

## Overall Comment:

Leela Prasad is a disciplined and capable learner with a strong academic foundation. By combining focused placement preparation, domain-specific certifications, and industry exposure through internships, he is well-positioned to secure placement in a reputed organization and achieve his career goals.
